CELEBRATING OUR 21st ANNIVERSARY OF LIVING & WORKING IN PERU

Hi everyone

Its David Groves CEO & owner of Adventure South America Motorcycling Ltd

STOP PRESS

To bikers all over the World!! It has been over 2 years now since our last tour in South America before the coronavirus pandemic that affected the running of our tours from the UK to South America but at least in 2022 we are planning our bike tours again. The good news is our prices for tours in 2022 will remain at the same price as shown in 2020!!!!.

2021 was to be our 21st Anniversary year of the starting of our bike tours initially just in Peru under Adventure Peru Motorcycling Ltd but back in 2016 we started to organise tours to Ecuador & Colombia & then in 2017 tours to Chile & Bolivia. We formed Adventure South America Motorcycling Ltd in June 2017 & that will be from now our corporate name to reflect the different countries in South America that we run tours.

We also are considering future bike tours in Brazil & Argentina once we get back into our normal routine. Many of our clients who due to the pandemic are coming back in 2022 & 2023 & have rebooked but we still have rider spaces for our July 2022 /3 week Southern Peru tour & our 2 & 3 week Northern Peru High Andes. Amazonas tours & also our new Eco tour to remote areas of the Northern Highlands of Peru also in September & October 2022 & May 2023.

*Spencer Conway has said he would like to join one of the tours this year, he stayed at our base on his circum -navigation by motorbike of South America & his new book on that is out shortly and features our tour company up in Cajamarca Northern Peru.

We hope to see you at bike shows this year any questions just email me David Groves on info@perumotorcycling.com Safe Biking!

THE 2022 ECO TOUR EVENT

We have been researching now for 2 years to provide an ECO TOUR in Northern Peru to give an opportunity to experience the life & workings of the people that live in the Andes in and around Celendin. Originally it was the Portugese conquistadors that settled in these area & the towns of Jerez, Sucre & Jose Galvez are designed on this colonial style. Few tourists ever get to see the amazing scenery of these areas & I have been fortunate that 3 of my team were born & raised there, so now is your chance to visit before climate change affects this unique unspoilt part of the high Andes, you can walk, hike, cycle, paint or travel by our motorbikes or in the comfort of our Hyundai 9 seater.

THE TEAM

Franco Guevara, Johansen Guevara, Jorge Sanches, David Groves

*Franco Guevara is one of 10 children & his Father still lives in a farm right at the top of the Andes near Jerez. Franco has been with APM now for 17 years and is a graduate in Electrical Engineering he started with us as a mechanic, speaks excellent English & is now our tour operations director.

Franco has built his own farmhouse at Sauce on the family land & built a hydro electric water supply plant & grows all his own crops & fruits. Franco was Peru's National cycling champion 2 consecutive years as a teenager so anyone can also go out cycling with him which is available to our clients. He is also an outstanding motorcyclist on or off-road he knows this area like the back of his hand!!

* Jorge Sanches our H1 driver & motorcyclist guide is Franco's cousin has been with APM now for 12 years he is also one of 10 children & inherited the family dairy farm & hacienda in Santa Rosa Celendin where he has a herd of Brown Swiss cattle. Jorge's family had a haulage company & he did regular runs from Celendin to Lima where he learnt his skill at driving.

* Johansen Guevara, our new brochure shows some of the amazing photos taken by Johansen Guevara a famous Peruvian wildlife photographer lives & works in Celendin Peru & is Franco's brother the 3rd member of this team he will accompany the groups on our Eco tours. He regularly takes groups out all over the area & knows so much about the wildlife, topography & birdlife of the area & hosts exhibitions all over Peru.

* David Groves our CEO will co-ordinate the various Eco trips & arrange accommodation & day to day activities to suit the clients. David speaks fluent Spanish & knows many of the people in the region. He has over 20 years experience living & working in the Cajamarca region of Peru.

Adventure South America Motorcycling Ltd celebrate 20 years living & working running Bike tours & adventure holidays from our own purpose built base in Cajamarca Northern Peru at

CASA BUENA VISTA.

The Tour

The tour will leave our own bike hotel, lodge in Cajamarca & stay at La Refugio a large Campestre in Jose Galvez set in the foothills of the Andes a wonderful tranquil place with individual cabins & main clubhouse for Bar BQ's. Great just for walking out & exploring Sucre & Jose Galvez.

During the Eco tour you will see rock formations, high lakes & waterfalls in the Andes also the volcanic hot baths at Langquat together with all types of wildlife & birds. We will also talk & stay with local people who live in the area. Tour dates & periods of stay on application David Groves CEO Adventure South America Motorcycling Ltd.

In October 2019 we undertook a pilot tour with Johansen Guevara & Franco Guevara that was a great success;

Dennis Carroll a regular ASAM tour guest was on his 10th Tour with Adventure South America Motoecycling wrote to me after that Eco tour;

"The tour area chosen with interesting topography, pleasant weather, coupled with accommodation ranging from quality hotels, delightful chalets & off the beaten track, farm homesteads also meeting & living with the Peruvian family we stayed with was both pleasant and educational, an experience not to be forgotten."

To add something to your life let Adventure Peru take you to the remote High Andes of Peru near Celendin, Chachapoyas, Sucre, Jerez & Sauce why not come & see this amazing area now!!!

We have produced this brochure of our new Eco tour with some amazing photographs courtesy of Johansen Guevara. The tours will be for riders & passengers in our Hyundai 9 seater to get the opportunity to experience a trip of a lifetime. Please note some walking will be involved to the more inaccessible sites but I am sure you will feel the effort is worthwhile.
